Report Last Edited By: Lisa Taylor

Last Edited Date: 07/01/2025

Report Owner: Lisa Taylor

Welcome to the KnowledgeSmart Skills Assessment Power BI Report Template.

This report allows you to import Skills Assessment data from your KnowledgeSmart account to gain insights into your organisations' inventory of skills and knowledge, training needs and development opportunities.

Demo Data: The report is pre-populated with demonstration data so that you may investigate the types of Skills Assessment data visualisation on offer.

Your Data: You can easily update this report with your own data and schedule an automated data refresh via one of our API calls. Detailed instructions on the update process using the Power BI export file are included in this report on page 2, User Guides.

Filter Pages: We have grouped all filters at the beginning of the report and each page has a reset button. We have created two filter pages, one for people filters and the other for assessment related filters.

User Guide: A detailed User Guide for this report is available for download from the User Guides page. This document is also available within your KnowledgeSmart account dashboard. Go to 'Settings > Resources' and look for 'Using the KnowledgeSmart Power BI Skills Assessment Report'.

This report comprises a mix of different types of Skills Assessment data visualisations. It is into different sections:

Invite History: This page helps you analyse data around the number of users and number of invites sent on your dashboard.

Background Data and General Statistics: Analyse the background data captured during the assessment process and some high-level statistics about your company's use of the platform.

Results: Overview analysis, Key Result Statistics, Benchmark Comparisons.

Training Tags: Training Tag Detail, Training Tag Comparison, Group Analysis 1, Group Analysis 2.

Training Requests and Skipped Questions: Analyse and compare key statistics around these two areas and view the filtered user data if needed.

Module Performance: Module statistics, Model Overview

Question Performance: Question Overview, Question Score Grader

Scorecards (To show you how some of our visualisations can be combined): Team Highlights, Team Scorecard 2, Individual Scorecard

User Guide

A detailed User Guide for this report is available for download from the User Guides page. This document is also available within your KnowledgeSmart account dashboard. Go to 'Settings > Resources' and look for 'Using the KnowledgeSmart Power BI Skills Assessment Report'.

Support and help.

For support and help with this Power BI report template please email support@eaglepoint.com or raise a support ticket via our Eagle Point support hub. Click the orange Support button whilst holding down the CTRL key to reach the support hub.

SUPPORT

USER GUIDE

Comprehensive User Guide.

You may download a detailed Help Note 'Using the KnowledgeSmart Power BI Skills Assessment Report' by clicking on the 'User Guide' button whilst holding down the CTRL key.

Data Security Level: High

This report contains confidential data and it is advised to check with the report owners before sharing it.

Sharing this report without consent will be considered a contravention of the company IT policy.

For support and help with this Power BI report template please email support@eaglepoint.com or raise a support ticket via our Eaglepoint Software support hub. Click the Support button whilst holding down the CTRL key to reach the support hub.

SUPPORT

From this page you may navigate around this Power BI report. Hold down the CTRL key and left mouse click on any of the buttons to take you to one of the pages of filters or visualisations.

On most pages you will find a HOME button like the one below.

Whilst holding down the CTRL key just left mouse click on this button to be brought back to this page.

On the filter page you will find a RESET button.

Holding down the CTRL key whilst left mouse clicking on the RESET button will clear all the filters. If you have used a search box on a filter you will have to clear that manually.

Look out for the info button each time for an explanation of that page.

FILTERS

To select multiple filter options use the CTRL key when making a selection in each box.

To reset ALL FILTERS use the CTRL key combined with a left mouse click on the RESET button.

The search box can find text within filters. Any text in search boxes must be deleted to clear the filter.

These filters should affect all visualisations.
